

REVISED

STATEMENT OF PURPOSE

RS29555 / H0615

This legislation will create the Idaho Energy Conservation Code in Title 39, Chapter 97, Idaho Code. The new chapter adds the current adoption of 2018 International Energy Code by the Building Code Board into Idaho Code. The Legislation prohibits local governmental entities from adopting any energy codes that differ from or are more extensive than the requirements of the Idaho Energy Conservation Code. The legislation does not adopt any new provisions of energy code and does not change the rulemaking authority for the Building Code Board under the Division of Occupational and Professional Licenses to make amendments, revisions or modifications to the Idaho Energy Conservation Code adopted by the Idaho Legislature.

FISCAL NOTE

This legislation will have no impact on the state's General fund or any dedicated fund or federal fund because adding this code adoption to Idaho Code does not create any new state program and does not compel any state action. The 2018 International Energy Conservation Code formally adopted into Idaho Code as the Idaho Energy Conservation Code through this legislation is already in place through Idaho administrative rule.
